About

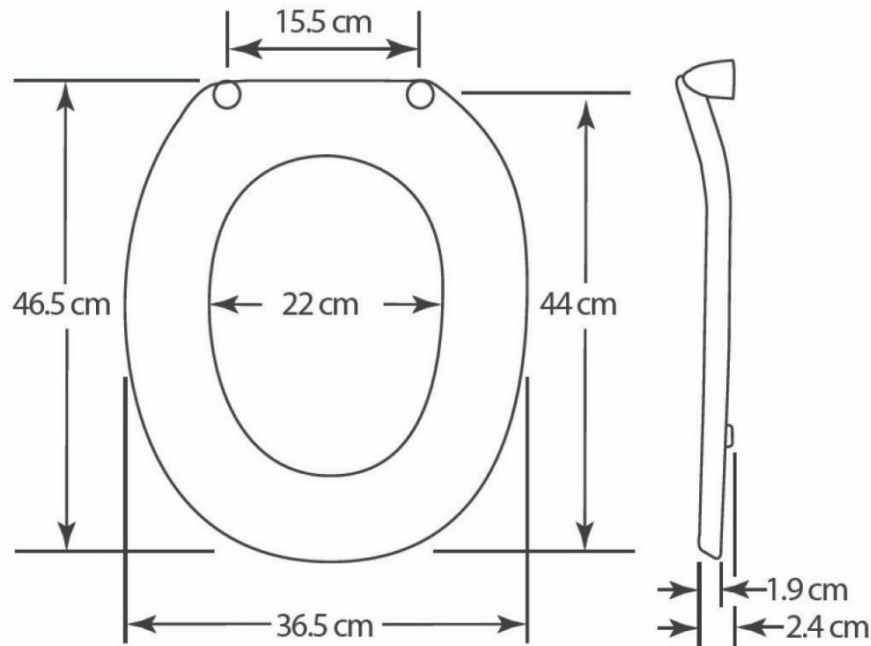

The Stainless Express range of toilet seats is offered to perfectly complement the Stainless Express range of stainless steel toilet pans and toilet suites. Each seat has been specifically selected with a specific use in mind. When seats are specified to be supplied with a Stainless Express toilet pan, the seat is installed on the pan before the toilet is dispatched from the respective Stainless Express manufacturing facility. PLEASE NOTE: Seats being installed on disabled toilets must be fully closed-fronted (not open fronted) in accordance with AS1428. In addition, single flap models (such as the 'SVRC' coded products) are recommended for installing on disabled toilets where a back rest is installed. When a back rest is installed, seat lids cannot be fully retracted and will prevent the user from being able to sit down.

Features

- Designed to suit Stainless Express toilet pans
- Vandal resistant models
- Economy options
- Single flap seats to suit disabled toilets where a backrest is installed
- Can be supplied installed on Stainless Express toilet pans
