About

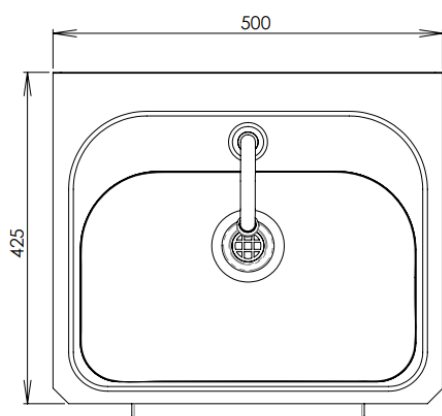

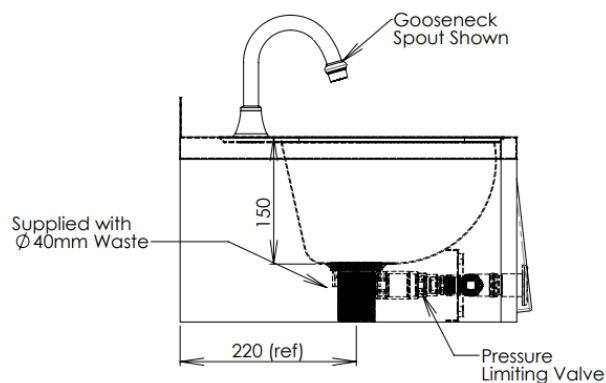

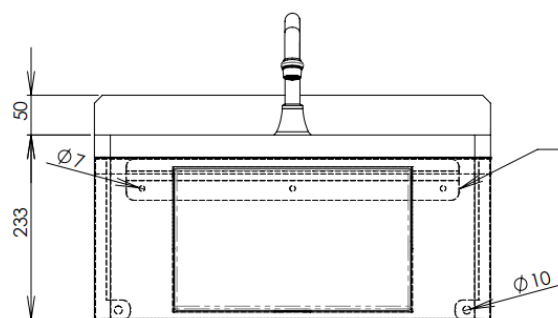

The Stainless Express Stainless Steel Multi Knee Operated Basin is ideal in areas where multiple users need to wash their hands simultaneously and avoid cross-contamination by using hands free tapware. Common installation areas include food handling, processing, manufacturing facilities and workshops. The tap is activated by leaning against the front push panels, eliminating the need for electronic / mains powered tapware. Supplied pre-plumbed and easy to install, the Multi Knee Operated Basin is extremely heavy duty and comes complete with wall brackets, spouts, pressure limiting valve and 40mm waste outlets.

Features

- Hands-free activation
- Prevents cross-contamination
- Complies with food prep. standards
- 11 litre bowl capacity
- Heavy duty operating valve
- No electrical connections
- Chamfered corners for added safety
- Supplied pre-plumbed ready to install
- Includes pressure limiting valve
- Grade 304 stainless steel
- 40mm waste outlet supplied
- Concealed wall brackets
- 50mm blade upstand to rear
- Goose level tap as standard
